

HOW TECHNOLOGY IS TRANSFORMING THE CONSTRUCTION INDUSTRY

**Monday, April 15, 2024
11:00am – 12:00pm PST
Via Zoom**

Technology is driving dramatic changes throughout the construction industry and every company is being affected. There is growing use of established software solutions while a host of emerging technologies and digital processes are rapidly gaining traction. Dodge Data & Analytics is a global leader in conducting extensive research on AEC technology and publishing free comprehensive reports which are frequently cited as authoritative references. Steve Jones, Senior Director of Industry Insights Research for Dodge Data & Analytics will share recent findings that highlight the most important technology trends impacting construction companies, with a particular focus on specialty trade contractors.
