

# INTRODUCTION TO AUTOCAD, REVIT AND BIM 360

Friday, June 7

11:00 AM - 12:30 PM

Via Zoom

Join us to learn about Autodesk's BIM software solutions. BIM is a method of tying together and managing project information through the use of 3-dimensional modeling, databases, and intelligent components. In this introductory course, Jason Gant, an Architectural BIM Manager with over 20 years of experience in the AEC industry, will provide an overview of AutoCAD, Revit, and BIM 360 applications and present glazing models for project examples.
