The AI boom has arrived, and so have the regulators. AI is no longer the Wild West. As state legislatures across the country enact new laws governing artificial intelligence, businesses face a rapidly expanding patchwork of compliance obligations across industries. Join us for an overview of the states that have established guardrails for AI development and deployment while taking its own innovation-focused approach.

LEARNING OBJECTIVES:

- Overview of the 2026 AI regulatory landscape
- Key state laws and emerging AI regulations
- California's approach to AI regulation
- Comparison of AI requirements in Texas, Colorado, Illinois, and New York
- AI compliance considerations for multistate organizations
- Employer responsibilities when using AI in decision-making
- Key AI governance and compliance requirements
- Building an AI governance program to address current and emerging regulations
